

HDI Predictor - Project Executable Files

Step 1: Submission Checklist

1. Complete source code – Yes
2. README / Setup Guide – Yes
3. requirements.txt – Yes
4. Database schema – NA
5. Environment configuration – NA
6. Deployed URL – No
7. Executable binary – NA
8. Dockerfile – NA
9. Test files – Yes
10. Demo video – Optional

Step 2: File Structure

HDI-PREDICTION/

- app.py
- model.pkl
- requirements.txt
- README.md
- dataset.csv
- templates/
- static/
- notebooks/

Step 3: Deployment Details

Hosted URL: Not Deployed

Login Credentials: Not Required

Platform: Local Flask Application

Repository: <https://github.com/vishnuvarma14/HDI-prediction>

Step 4: Run Instructions

1. Install Python 3.10+
2. pip install -r requirements.txt
3. python app.py
4. Open <http://127.0.0.1:5000>

Step 5: Known Issues / Limitations

- Accuracy depends on dataset quality.
- Supports only trained features.
- Local deployment only.
