

## Solution Requirements

|                      |                                   |
|----------------------|-----------------------------------|
| <b>Date</b>          | 15 June 2026                      |
| <b>Team ID</b>       | XXXXXX                            |
| <b>Project Name</b>  | Human Development Index Predictor |
| <b>Maximum Marks</b> | 4 Marks                           |

### Define Functional and Non-Functional Requirements:

Create a comprehensive list of requirements to define exactly what your solution will do and how well it will perform.

- **Functional Requirements (FR)**
  - Accept user input.
  - Predict HDI score.
  - Classify HDI level.
  - Display results.
- **Non-Functional Requirements (NFR)**
  - User Friendly Interface
  - Fast Response Time
  - High Accuracy
  - Reliability
  - Scalability

Fill out the descriptions and necessary details for each category provided below.

### Step 1: Functional Requirements (FR)

| S.No | Requirement Category | Requirement Description | Priority (High/Medium/Low) |
|------|----------------------|-------------------------|----------------------------|
|      |                      |                         |                            |

|          |                         |                                                                                              |  |
|----------|-------------------------|----------------------------------------------------------------------------------------------|--|
| <b>1</b> | Authentication          | <i>[Describe how users will securely log in or verify their identity]</i>                    |  |
| <b>2</b> | Authorization levels    | <i>[Define the user roles and what access/permissions each role has]</i>                     |  |
| <b>3</b> | External interfaces     | <i>[Detail any third-party APIs, external databases, or</i>                                  |  |
|          |                         | <i>services the system must connect to]</i>                                                  |  |
| <b>4</b> | Transactions processing | <i>[Explain how data exchanges, payments, or core system transactions will be handled]</i>   |  |
| <b>5</b> | Reporting               | <i>[Describe the types of reports, dashboards, or data exports the system must generate]</i> |  |

|   |                                   |                                                                                                               |  |
|---|-----------------------------------|---------------------------------------------------------------------------------------------------------------|--|
| 6 | Business rules, etc.              | <i>[List specific logic, constraints, or workflows unique to the business process]</i>                        |  |
| 7 | Compliance to laws or regulations | <i>[Specify any legal, industry, or data privacy standards the system must adhere to (e.g., GDPR, HIPAA)]</i> |  |
| 8 | Other                             | <i>[Add any additional functional requirements here]</i>                                                      |  |

**Step 2: Non-Functional Requirements (NFR)**

|   |                     |                                                                  |                                                       |
|---|---------------------|------------------------------------------------------------------|-------------------------------------------------------|
| 1 | Performance & Speed | <i>[Describe response times, processing speed, etc.]</i>         | <i>(e.g., Page loads in &lt; 2 seconds)</i>           |
| 2 | Scalability         | <i>[Describe how the system handles growth in users or data]</i> | <i>(e.g., Supports up to 10,000 concurrent users)</i> |

| S.No | NFR Category | Requirement Description | Target Metric / Acceptance Criteria |
|------|--------------|-------------------------|-------------------------------------|
|      |              |                         |                                     |

|          |                            |                                                                                              |                                                    |
|----------|----------------------------|----------------------------------------------------------------------------------------------|----------------------------------------------------|
| <b>3</b> | Security & Data Privacy    | <i>[Detail data protection, encryption, and vulnerability management]</i>                    | <i>(e.g., End-to-end AES-256 encryption)</i>       |
| <b>4</b> | Reliability & Availability | <i>[Specify uptime requirements and fault tolerance]</i>                                     | <i>(e.g., 99.9% uptime per month)</i>              |
| <b>5</b> | Usability & Accessibility  | <i>[Describe user experience standards and accessibility compliance]</i>                     | <i>(e.g., Complies with WCAG 2.1 AA standards)</i> |
| <b>6</b> | Other                      | <i>[Add any additional non-functional requirements (e.g., Maintainability, Portability)]</i> |                                                    |
